

Green Crocodile group at Forest School

April 14th 2015

Come and
share our
adventure!

On our way...

We all sat waiting on the Giant's chair (or horse jump). We didn't really know what to expect and were feeling many different things. Some of us shared our thoughts with our friends...

*I feel nervous, I haven't
been before.
Oscar*

As soon as we entered the forest, all of our worries quickly disappeared because we were having such a lovely time.

*I feel proud. I am not
nervous now!
Oscar*

Our walk to Forest School

Over the stile. You have to be good at balancing!

Walk through the Forest and keep an eye out for the "Fire Circle".

Stay off the path!
We have lots of room in the forest to play,
If we see the path we need to go the other way!

Walk past Green Crocodile.

Forest School, Forest School - let us in please!

We collect our badges and then we can go and play!

1,2,3 Where are you?

We played 1,2,3...Where are you? This game is like 'hide and seek'. We found some amazing hiding places.

The really enjoyed hiding and looking for his friends.

Holes, holes and more holes!

We were very, very, VERY interested in all the holes that we found all over the Forest. We asked Kerry...

How did they get there?

The squirrel made the holes in the tree to help him to climb up!

Szymon

We thought that maybe...

Kerry drilled the holes.

The squirrels live in the trees!

It was the fairies!

Rabbits live in holes!

Balancing

The forest was full of branches and stumps that were perfect for balancing on. We all tried really hard. Zane had such a really good idea to help his friends who were finding balancing a little tricky that we all decided to join in. We said things like...

That's amazing!

Come on... You can do it!

It really helped!

What can you hear?

We all stood still and listened very carefully.
We could hear lots of different sounds.

Houses for the wildlife

We found a really big hole and wondered who lived here. Maybe a fox or a badger? We will have to do some more investigating to find out!

WOW!
Can I blow it!?
Zane

Julia showed us a birds nest and we told her...

You need little sticks to make a nest.
Dalkeerat

The bird uses his beak and foot to build the nest.
Charlie

I made a square!

We found...

She found a shield bug and Kieran thought...

It looks like a knight!

We looked very carefully and found lots of tiny creatures. These are called 'minibeasts'.

This tree stump was very exciting because something small was running very quickly across it. Millicent said...

*It's inacey, pincey.
Special, tiny*

These yellow flowers are called celandines.

We know that...

You can make lots of things out of the twigs that you find on the forest floor. Look what we can do...

I've made a v

Julia showed us the holly bushes that are in the Forest. We know that you have to be careful. Pixie-Lou told us that...

It won't hurt you if you stroke it gently.

It's going to be 20 degrees.
Lyra

Twigs can be very tricky to snap, but if you keep trying they will always go SNAP in the end.

Harley says that if there is a fire we must call "Fireman Sam 999."

We need to keep away from the fire circle.

What new adventures will next week have in store for us?

Who knows, but we are all really looking forward to it!
