

The incubator and eggs have arrived at Gloucester Nursery School!

Great excitement as the eggs arrived at School. Every child had the opportunity to visit the eggs and make suggestions as to what would hatch out of the eggs! Everyone waited with eager anticipation.

Two days later the wait was over. The chicks began to chip their way out of their eggs. There were many squeals of delight as all ten chicks successfully hatched.

My – how quickly they grow! The chicks were moved into the main Nursery, out from under their heat lamp and they were big enough to be able to play in the run. What cheeky chicks they are.

Unfortunately, with the end of term looming, the children had to say goodbye to the chicks.
